

IS YOUR SCHOOL AI-READY?

A 60-SECOND SELF-ASSESSMENT FOR
SCHOOL LEADERS & EDUCATORS

SCORE EACH STATEMENT:

3

= Yes

2

= Partially

1

= Not Yet

1. Our school has discussed how AI will impact learning.

☐☐☐

2. Teachers understand the difference between AI tools and AI literacy.

☐☐☐

3. Students are learning how AI works, not just how to use it.

☐☐☐

4. Critical thinking is intentionally taught across grade levels.

☐☐☐

5. Students are taught how to verify information generated by AI.

☐☐☐

6. We have guidelines for responsible AI use.

☐☐☐

7. Teachers receive training on AI and emerging technologies.

☐☐☐

8. Parents are informed about AI-related opportunities and risks.

☐☐☐

9. Students use technology to create, not only consume.

☐☐☐

10. Our school has a vision for preparing learners for an AI-driven future.

☐☐☐

TOTAL SCORE: _____ / 30

Add your points (3, 2, or 1) for each statement.

“

AI literacy is not about teaching students how to use AI tools.

It is about teaching them how to think, create, question, and use technology wisely.

— Miss JOY

★ YOUR RESULTS ★

25-30

Future-Ready School

Your school is already building important foundations for AI literacy.

18-24

Building Momentum

You're moving in the right direction, but there may be opportunities to strengthen implementation.

10-17

Emerging Awareness

AI conversations have started, but a more structured approach may be beneficial.

0-9

Opportunity Ahead

AI literacy is becoming increasingly important for future learners. Starting now creates an advantage later.

READY TO PREPARE LEARNERS FOR AN AI-DRIVEN WORLD?

AI Literacy Curriculum

Age-appropriate, standards-aligned lessons & resources.

Teacher Professional Development

Practical training to build confidence and classroom impact.

School Implementation Support

Guidance, planning, and ongoing support for lasting success.

Parent Education Programs

Empowering families to understand AI opportunities and responsibilities.
